

SolidSail one step further ahead

SAINT NAZAIRE, FRANCE (May 30, 2023)

Chantiers de l'Atlantique partners with Avel Robotics, CDK technologies, Lorima, Multiplast and SMM to start up SolidSail Mast Factory.

This joint-company aims to gather experience of each and every partner for ramping up large carbon mast production. In this perspective, cruise and large cargo vessels markets heading for reducing their carbon emissions are the main objectives for SolidSail Mast Factory development in the coming years.

A dedicated factory will be erected in Lanester (56), to be located next to the excellence pole of marine composite industry and first masts shall start being produced by late 2024.
